Stereoplay | Germany | July 2022

"Without a hint of reservation, we can recommend this loudspeaker to good friends. You get a speaker that delivers a magnificent sound without dominating visually – and yet you won't be poor. Magic is performed here, honestly and at a price that is almost indecent."

PDF

A British Audiophile | February 2023

"The AE109²s sound exactly as they look. Elegant, refined and with sophistication beyond their price."

Alpha Audio | The Netherlands
March 2022

"You already understand. The Acoustic Energy AE109 is an amazing speaker for the money! We honestly don't quite understand how Acoustic Energy can produce this for 700 Euro sales. In our estimation, the Acoustic Energy AE109² could also be included in the 1000 Euro class. They are that good."

HiFi and Music Source | UK
September 2022

"Although other loudspeakers have been on the premium side of the price band, these Acoustic Energy 109.2 are easily keeping up with these pricier offerings. There is a presence, volume and detail in these Acoustic Energy 109.2 loudspeakers that is hard to fault at this price."

WEB

The Ear | UK | February 2022

"So long as the price doesn't double when Acoustic Energy read this, I think we have here the 'bargain of the moment' when it comes to accomplished loudspeakers; certainly, at entry-level, but almost at any level. The AE109² really are that good."

Gedeon Audio | Hungary | April 2022

"We get stiff and defined lows, at such definition that I have never heard from any of its competitors. There is bigger, stronger, but none so articulate. The warm and soft mid range, and detailed highs are the cherry on top of the experience"

"Considering the price-value, I have only one question, what else could we ask for this much?"

Audio Vision Online | Hungary |April 2022

"The power of the bass range was felt in all kinds of music, yet we never considered it intrusive or self-evident, it simply showed its knowledge with confidence."

"Such an exemplary, compact standing speaker"

"No revolutionary innovations have been used, but rather the solutions and speakers that have been used and proven so far have been strengthened or redesigned, resulting in a compact stand-up model in the form of the AE109² that pushes the boundaries of it's category in every way."
